

Pre-Painted Metal Coils

These pre-painted metal coils are manufactured with a durable coating applied to either steel or aluminum. They are suitable for applications in roofing, automotive components and appliance manufacturing.

ADDITIONAL IMAGES

Product Overview

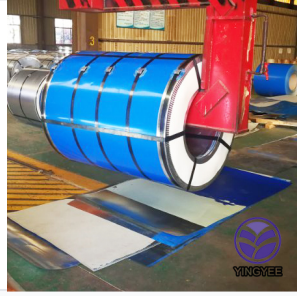

Continuous coil coating ensures uniform paint application and excellent adhesion across the substrate.

High-Performance Pre-Painted Coils

These high-quality pre-painted metal coils provide a durable, corrosion-resistant solution for diverse industrial and construction needs. Manufactured through a continuous coating process, they ensure uniform paint application, superior adhesion, and excellent resistance to weathering, UV radiation, and corrosion. With a wide range of available colors, finishes, and paint systems, they are perfectly suited for roofing, siding, automotive components, and appliance manufacturing.

Technical Specifications

Durable pre-painted steel coils designed for long-lasting performance in construction and automotive manufacturing.

Surface Finishes	Glossy, Matte, Textured
Paint Systems	Polyester, Epoxy, Polyurethane, PVDF

Applications

Industry Applications

- Roofing
- Cladding & Siding
- Appliance Manufacturing
- Automotive Parts
- General Industrial Construction
