

Pre-Painted Metal Coils

These pre-painted metal coils offer a durable coating for various industrial applications. The coils provide excellent corrosion resistance and are available in a range of colors and thicknesses.

ADDITIONAL IMAGES

Overview

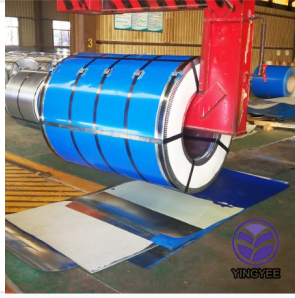

Uniform coating provides excellent corrosion resistance and aesthetic appeal.

High-Performance Pre-Painted Coils

These pre-painted metal coils are designed for diverse industrial applications, offering a perfect blend of durability and aesthetic appeal. Engineered with advanced coating technology, they provide superior corrosion resistance and consistent color finish, ensuring long-lasting performance in various environments. They are ideal for manufacturing high-quality components for the construction, automotive, and appliance sectors.

Technical Specifications

Precision-manufactured coils suitable for roofing, siding, and appliances.

Material Thickness

0.13 - 1.0 mm (BWG/AWG standards)

Aesthetic Options

Available Colors

White, Black, Beige, Red, Green, Copper

Applications

Primary Industries

- Construction
- Automotive
- Appliance Manufacturing
- Roofing and Siding

Quality & Standards

Key Quality Features

Corrosion Resistant • Consistent Thickness • Uniform Coating • High Adhesion
