

Precision Adsorption Column Cleaner

This precision adsorption column cleaner is designed for cleaning and drying without dis-assembly. It protects adsorption columns from damage, which is essential for hydrocarbon measuring devices.

Product Overview

Precision Adsorption Column Cleaning System

The Precision Adsorption Column Cleaner is engineered for efficient maintenance of laboratory and industrial adsorption columns. It features a robust cleaning structure that ensures powerful results without damaging delicate column components. Designed for ease of use, the system provides clear pressure monitoring and rapid washing and drying cycles to significantly improve operational efficiency.

Key Features

Operational Advantages

- Reasonable cleaning structure for easy operation
- Evident pressure monitoring
- Rapid washing and drying process
- High work efficiency
- Non-damaging cleaning performance

Technical Specifications

Pressure

0.1 MPa

Operating Pressure

Power Consumption

120 W

Rated Voltage

AC 220V±10% 50Hz

Environment

Recommended Environment

Parameter	Value
Temperature	20 – 30 °C
Humidity	d 85%
