

Precision Aluminium Casting with Mounting Flange

This precision-engineered aluminium casting is designed for robust performance in demanding applications. The component features a cylindrical upper section, a flanged mid-section with integrated mounting brackets, and a square lower section.

Product Overview

Precision Aluminium Casting

This precision-engineered aluminium casting is designed for robust performance in demanding industrial applications. The component features a unique structural design comprising a cylindrical upper section, a flanged mid-section with integrated mounting brackets, and a square lower section. Manufactured to exacting tolerances, it ensures reliable integration and optimal functionality within complex mechanical systems and industrial machinery.

Design & Structure

Component Geometry

- Cylindrical upper section
- Flanged mid-section
- Integrated mounting brackets
- Square lower section

Technical Specifications

Tolerance Level

Exacting Tolerances • High Precision

Manufacturing Process

Precision Aluminium Casting

Application

Recommended Applications

Industrial Tools, Mechanical Systems, Heavy Machinery

Installation Feature

Integrated Mounting Flange
