

# Precision Angle Protractor with Rotating Arm

Precision stainless steel protractor designed for accurate angle measurement and marking. It features a rotating arm for precise angle setting and a ruler with clear metric graduations.

## Product Overview

### Professional Precision Angle Measurement

This stainless steel precision angle protractor is designed for high-accuracy measurement and marking across engineering, woodworking, and technical drafting applications. It features a versatile rotating arm and a clearly marked ruler with metric graduations for enhanced usability. Built for durability and reliability, this tool supports multiple configurations to meet diverse project requirements.

## Material and Design

Material	Stainless Steel
Key Features	Rotating Arm, Metric Graduations, Customizable Logo

## Configuration Options

Available Types	
<ul style="list-style-type: none"><li>Type A</li><li>Type B</li><li>Type C</li></ul>
