

Precision Bench Vise with Swivel Base

This precision bench vise is designed for securely holding workpieces during machining and assembly. It features hardened and ground jaws, a swivel base with degree markings, and a robust clamping mechanism.

Product Overview

Precision Bench Vise with Swivel Base

This precision bench vise is engineered for secure workpiece holding during demanding machining, fabrication, and assembly operations. It features hardened and ground jaws that ensure long-term durability and high-precision accuracy. Equipped with a swivel base featuring clear degree markings, it allows for versatile angular adjustments, making it an essential tool for metalworking, woodworking, and general-purpose workshop applications.

Key Features

Features

- Hardened and ground jaws
- Swivel base with degree markings
- Robust clamping mechanism
- High-precision performance

Applications

Suitable Applications

Metalworking, Woodworking, Fabrication, Assembly Operations

Technical Details

Swivel Range

360 degrees

Rotation
