Product Overview

Precision Brass Component

This precision-machined brass fitting is designed for high-performance fluid control and mechanical applications. Engineered with a durable, forged brass body and subjected to rigorous standard gauge checking, it ensures leak-proof reliability in demanding industrial environments. The design features a stepped, hexagonal configuration for secure wrenching and precise thread integration.

Technical Dimensions

Detailed Measurements

Feature	Value	Unit
Overall Height	107.6	mm
Outlet Diameter 1	22	mm
Outlet Diameter 2	17	mm
Central Radius	8	mm
Central Diameter	25	mm
Base Thickness	5	mm
Total Thickness	21.76	mm

Featured Metrics

120 degrees
Internal Angle

30 degrees
Outlet Angle
