

Precision Cutting Machine with Water Cooling

This cutting machine is designed for precision cutting tasks. It features a water tank that suppresses dust and cools the blade, improving cutting performance and prolonging blade life.

Overview

Precision Cutting Performance

The TF300 series is a robust and efficient precision cutting machine designed for demanding construction and maintenance tasks. Equipped with an integrated water tank, it ensures effective dust suppression and blade cooling, which significantly enhances cutting performance and extends the lifespan of your blades. Its sturdy frame provides essential stability, while the adjustable cutting depth and ergonomic controls offer versatility and operator comfort for professional applications.

Technical Specifications

Model Specifications

| Model | Engine Type | Power (kW) | Mass (kg) |
|----------|-----------------------|------------|-----------|
| TF300-2 | Chinese Petrol Engine | 4.8 | 58 |
| TF300-3 | Petrol, Robin EX17 | 4.2 | 58 |
| TF300-3Y | Petrol, Robin EY20 | 3.7 | 60 |
| TF300-4 | Petrol, Honda GX160 | 4 | 58 |

Performance Metrics
