

Precision Dial Indicator

This precision dial indicator offers selectable measurement ranges of 0-3mm, 0-5mm, and 0-10mm, all with a resolution of 0.01mm. It features a 41mm dial face for easy reading and is ideal for precise measurement and inspection applications.

Overview

Precision Dial Indicator

This precision dial indicator is designed for accurate measurement and inspection tasks in industrial environments. Featuring a clear 41mm dial face, it ensures easy readability for operators. With selectable measurement ranges and a consistent resolution of 0.01mm, this tool provides the reliability needed for quality control and precision engineering applications.

Technical Specifications

Available Measurement Ranges

- 0-3mm
- 0-5mm
- 0-10mm

Resolution	0.01 mm
Dial Face Diameter	41 mm
Model Identifier	EK-2101

Applications

Primary Applications	Precision Measurement, Quality Inspection, Industrial Engineering
----------------------	---
