

Precision Drilling Machines

These drilling machines are designed for precision work in both woodworking and metalworking. Each tool features a vertically adjustable platform and a sturdy base for stability.

Overview

Precision Drilling Performance

These precision drilling machines are engineered for demanding woodworking and metalworking environments. Featuring sturdy bases and vertically adjustable platforms, they provide the stability and control required for accurate hole placement. The versatile design supports various drilling configurations, making them an essential asset for workshops requiring consistent, high-quality results.

Model Variants

Available Models

- RDM1301BN
- RDM1603BVB
- RDM2802BN

Key Features

Design Highlights

Vertically Adjustable Platform • Sturdy Base Construction • Multiple Handle Configurations

Applications

Woodworking, Metalworking, Precision Drilling
