

# Precision End Mill for Machining

High-performance end mills designed for precision machining. Featuring advanced cutting geometries and durable materials, these end mills ensure efficient material removal and extended tool life.

## Product Overview

### Precision End Mill for Machining

These high-performance end mills are engineered for precision machining tasks, offering advanced cutting geometries for efficient material removal. Designed for durability and extended tool life, they ensure excellent surface finish and dimensional accuracy across a variety of applications. This comprehensive range of sizes and configurations allows for flexibility in meeting specific industrial machining requirements.

## Technical Dimensions

### Size Specifications

No.	L1 (mm)	L (mm)	MT (Flutes)
14	15	105	2
16	15	105	2
18	20	110	2
20	20	130	3
22	20	130	3
24	20	130	3
25	20	130	3
26	20	130	3
28	20	155	4
30	25	160	4
32	25	160	4
35	25	160	4
36	25	160	4
38	25	160	4
40	25	160	4
42	25	160	4
45	30	170	4
50	30	170	4
