

Precision Film Slitting Machine

This precision slitting machine converts flexible materials into narrower widths. It is suitable for films, foils, paper, and textiles, with adjustable blades and tension control.

Overview

High-Precision Slitting Solution

This high-precision slitting machine is designed for the efficient conversion of flexible materials including films, foils, laminates, paper, and textiles. It features advanced automated systems like tension control, web guiding, and PLC-driven operation to ensure maximum productivity. Built for reliability in demanding industrial environments, the machine provides adjustable slitting configurations to meet diverse production requirements across packaging and printing sectors.

Technical Specifications

Automation Capabilities

- Programmable Logic Controller (PLC)
- Automatic Tension Control
- Web Guiding System
- Automated Winding

Slitting Methods

Razor, Shear, Score

Safety & Compliance

Integrated Safety

Emergency Stop, Safety Guards
