

Precision Fine Wire Spools

These are spools of fine wire, likely used in electronics or other precise applications. The wire is wound on white spools with a blue and white design.

Product Overview

Precision Fine Wire Spools

These high-quality precision fine wire spools are engineered for demanding industrial and electronic applications requiring consistent performance. Designed with a focus on reliability, the spools ensure smooth handling and minimal tension variation during use. Ideal for winding, cabling, and precision assembly tasks, this wire solution supports efficient production workflows.

Technical Specifications

Model Identifier	BD-P400
Primary Application	Electronics, Precision Assembly, Winding
