

Precision Injection Molding Machine

This high-performance injection molding machine is designed for precision plastic part manufacturing. It features a robust frame, advanced servo-hydraulic system, and user-friendly control interface.

Overview

Precision Injection Molding Performance

This high-performance injection molding machine is engineered for precision plastic part manufacturing, offering exceptional repeatability and minimal material waste. Built with a robust frame and advanced servo-hydraulic systems, it is designed for high-volume production of complex geometries. The integrated control interface ensures reliable operation, making it an ideal solution for demanding industrial manufacturing environments.

Technical Specifications

Locking Force	350 ton
Screw Diameter	50 mm
Injection Weight	441 cm ³
Mold Size	610 x 650 mm

Electrical Requirements

Power Rating

65 KW

Power

Voltage/Phase	380V / 3 Phase
