Product Overview

Precision Laser Level System

This precision laser level is engineered for comprehensive alignment and leveling tasks in professional construction, surveying, and interior design environments. It projects three 360° laser planes—one horizontal and two vertical—that intersect at 90° angles for maximum coverage. Designed for versatility, it features a self-leveling mechanism and a pulse mode compatible with external laser receivers for outdoor operation.

Technical Specifications

Laser Configuration

- 1 x 360° Horizontal Plane
- 2 x 360° Vertical Planes
- 90° Vertical Intersection

Operating Modes

Self-Leveling, Pulse Mode, Outdoor Compatible

Mounting

Tripod-mountable design for enhanced stability

Safety & Compliance

Safety Warnings

Caution: Laser Radiation
