

# Precision Machined Brass Fittings

These precision machined brass fittings are designed for various industrial applications. The parts feature threaded connections for secure assembly and are made from brass for excellent corrosion resistance and durability.

## ADDITIONAL IMAGES

## Product Overview

### Precision Engineered Brass Components

These precision-machined brass fittings are designed for demanding industrial applications requiring high durability and corrosion resistance. Manufactured using digital lathe technology, each component undergoes rigorous quality control using standard gauge checking to ensure consistent, reliable performance. We offer flexible manufacturing solutions, supporting custom drawings and samples to meet specific project requirements without additional mould or tooling costs.

## Manufacturing & Quality

### Customization Services

- Custom drawing support
- Sample production
- Free mould and tooling making

### Production Standards

Digital Lathe Machined, Standard Gauge Checked, Forging Body Construction

## Technical Specifications

### Y-Connector Dimensions

**107.6 mm**

Total Height

**30 deg**

Arm Angle

**22 mm**

Diameter A

**17 mm**

Diameter B

**25 mm**

Diameter C

### Angular Specifications

Feature	Angle
Conical Seat	120°
Beveled Surface	45° ± 1°2'
