

Precision Metal Cutting Band Saw

This precision machine tool is designed for intricate cutting operations. Equipped with adjustable controls for optimizing cutting speed and tension, it ensures high-quality results across various materials.

Product Overview

Precision Cutting Performance

This precision machine tool is expertly designed for intricate cutting operations, featuring a robust frame and a spacious work table for enhanced stability. Equipped with a vertically reciprocating blade, it delivers accurate and clean cuts across a variety of materials, making it an essential asset for professional woodworking and fine model making. Adjustable controls for cutting speed and tension, combined with a convenient hands-free foot pedal, ensure optimal efficiency and safety during operation.

Technical Specifications

Model Identifier	MJ448
Machine Type	Woodworking Band Saw

Key Features

Operational Features

- Adjustable cutting speed
- Adjustable blade tension
- Hands-free foot pedal operation
- Robust frame construction

Best For	Professional Woodworking, Model Making, Fine Cutting Operations
