Product Overview

Precision Metal Lathe

This precision metal lathe is engineered for versatile machining operations including turning, facing, threading, and drilling. Built with a robust cast iron bed, it offers exceptional stability and vibration damping for high-accuracy work. It is an ideal solution for tool rooms, professional workshops, and educational institutions requiring reliable performance.

Technical Specifications

Model Details

180 mm
Swing

300 mm
Distance Between Centers

Speed Control

Variable Speed

Model Number

CQ660 10

Machining Capabilities

Supported Operations

- Turning
- Facing
- Threading
- Drilling

Construction & Safety

Certifications

CE

Safety Equipment

Chuck Guard, Emergency Stop
