

Precision Metal Spacers and Washers Set

This collection features precision-engineered metal washers and spacers in various sizes and thicknesses. These components are suitable for mechanical assemblies, shimming, and load distribution.

Product Overview

Precision Metal Spacers and Washers Set

This comprehensive set of precision-engineered metal spacers and washers is designed for demanding mechanical applications. Featuring a variety of sizes and thicknesses, these components are essential for accurate shimming, load distribution, and spacing in complex assemblies. Manufactured to exacting tolerances, they ensure optimal performance and reliability in professional industrial environments.

Technical Details

Material	Ferrous Metal (Steel/Stainless Steel)
Included Components	Solid Cylindrical Spacers, Flat Washers
Finish	Machined

Applications

Primary Applications

- Mechanical Assemblies
- Shimming
- Load Distribution
- Component Spacing
