

Precision Plate Making Machinery Component

This is a precision-engineered component for plate making and printing machinery. It is characterized by robust metal construction and incorporates pneumatic or hydraulic connections.

Product Overview

High-Precision Engineering

This precision-engineered component is designed specifically for plate-making and printing machinery applications. Featuring a robust metal construction, it ensures durability and reliability in demanding industrial environments. The unit integrates advanced pneumatic or hydraulic connectivity, complete with an integrated pressure monitoring system to maintain optimal operational standards.

Technical Specifications

Integration Features

- Multiple mounting points
- Pneumatic/Hydraulic connections
- Integrated pressure monitoring
- Precision alignment markings

Material Construction	Stainless steel or aluminum alloy
Monitoring	Yes

Application

Primary Application	Plate Making, Printing Machinery, Industrial Automation
---------------------	---
