

Precision Shim Stock Roll

Precision-rolled shim stock is available in varying thicknesses from 0.01mm to 0.25mm. Each roll measures 12.7mm wide and 5 meters long, ideal for custom length cuts.

Product Overview

Precision Shim Stock Roll

This precision shim stock roll is manufactured in Europe in strict accordance with DIN2275 standards, ensuring high-quality performance for industrial applications. Constructed from premium stainless steel or alloy steel, it offers exceptional durability with a hardness range of 360-600HV. Its superior surface finish, featuring a roughness of Ra 0.4 μ m, significantly prolongs service life in demanding mechanical environments.
