

Precision Sliding Table Saw for Woodworking

This precision sliding table saw is designed for woodworking applications. It features a robust frame, smooth sliding table, and powerful motor for accurate and efficient cutting.

Product Overview

Precision Woodworking Performance

This precision sliding table saw is engineered for high-accuracy cutting of both wood panels and solid wood materials. The machine features a robust, heavy-duty frame designed to minimize vibration during operation. With a smooth-gliding table mechanism and an integrated tilting blade system, it offers the versatility required for complex joinery and large-scale panel processing.

Technical Specifications

Build Features

- Robust heavy-duty frame
- Precision-engineered sliding table
- Adjustable guiding fences
- Versatile blade tilting mechanism

Cutting Capabilities

Tilting Blade, Adjustable Fences, Sliding Table Action, Panel Processing, Solid Wood Cutting
