

Precision Sliding Table Saw for Woodworking

This precision sliding table saw is designed for woodworking applications. It features robust construction, a smooth sliding mechanism, and accurate cutting capabilities.

General Information

Precision Woodworking Solution

This precision sliding table saw is engineered to meet the demanding requirements of professional woodworking shops and furniture manufacturing facilities. Featuring robust construction, it ensures stability during high-volume production cycles. The integrated smooth sliding mechanism provides exceptional accuracy and control for complex cutting tasks, making it a reliable asset for craftsmen seeking consistent high-quality results.

Model Number

MJ6128A

Applications

Furniture Manufacturing, Professional Woodworking, Custom Carpentry
