

Precision Steel Punching Parts for Sockets

These high-precision steel punching parts are designed for socket applications. They are manufactured with tight tolerances to ensure accurate fit and reliable performance.

Product Overview

High Precision Socket Components

These custom steel punching parts are engineered for high-precision socket applications, ensuring tight tolerances and reliable performance. Designed for demanding industrial environments, the components feature optimized material selection for durability and precise geometry. They are suitable for a wide range of metal forming and assembly needs.

Manufacturing Capabilities

Production Capacity

115 units

Processing Equipment Sets

160 T

Max Press Capacity

5 T

Min Press Capacity

Equipment Breakdown

Equipment Type	Quantity
16T-60T Punching Press	16
45T Multi-station Press	16
160T Precision Press	3
15T-80T High-speed Press	8
5T-200T Punching Press	24

Stamping & Drawing Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing

Applications

Typical Applications

- EPS Steering Motor Steel Housing
- Automobile Sensor Signal Wheel
- Shock Absorber Signal Wheel
- Automobile Engine Signal Wheel
- Lithium-ion Battery Housing
- Electron Gun Metal Stamping Parts
- Metal Stamping Printer Parts
- Copier Parts Stamping
