

Precision Surface Grinding Machine

This precision surface grinding machine is designed for high accuracy and efficient material removal. It features a robust build with a large, stable worktable and a vertically adjustable grinding head.

Overview

Precision Surface Grinding Machine

This precision surface grinding machine is engineered for high accuracy and efficient material removal in demanding industrial environments. Featuring a robust construction with a large, stable worktable and a vertically adjustable grinding head, it ensures consistent performance. The integrated control panel allows for precise adjustments of grinding parameters and automated processes, making it an ideal solution for applications requiring fine surface finishes and tight tolerances.

Key Features

Model Designation	FA-600AHD/AHR
Machine Type	Auto Surface Grinder
Primary Capabilities	High Accuracy, Efficient Material Removal, Fine Surface Finish, Tight Tolerances

Technical Specifications

Performance Highlights

600 mm

Worktable Capacity

Control System	Yes
