

# Precision Surface Grinding Machine

This precision surface grinding machine is designed for high accuracy and fine finishing of flat surfaces. It features a robust construction with a cast iron base and column for stability and vibration damping.

## Overview

### Precision Surface Grinding Machine

This precision surface grinding machine is engineered for high-accuracy finishing of flat surfaces, making it an essential tool for demanding environments. It features a robust cast iron construction that provides exceptional stability and vibration damping during operation. Equipped with a powerful grinding wheel motor and a precision spindle, it ensures smooth material removal and superior surface quality. The integrated coolant system further enhances reliability by preventing thermal deformation during intensive machining tasks.

## Key Features

Suitable Applications	Tool and Die Making, Mold Manufacturing, General Precision Machining
Construction Material	Cast Iron Base and Column

## Technical Specifications

Feed Control Options	
<ul style="list-style-type: none"> <li>Manual Feed</li> <li>Automatic Feed</li> </ul>	
Coolant System	Yes
