

Precision Surface Grinding Machine

This precision surface grinding machine is designed for high accuracy and fine finishing of flat surfaces. It features manual controls, robust cast iron construction, and a coolant system.

Overview

Precision Surface Grinding Machine

This precision surface grinding machine is engineered for high-accuracy finishing of flat surfaces, making it an essential tool for demanding environments. Built with a robust cast iron construction, it ensures exceptional stability and superior vibration dampening during operation. The system includes integrated manual controls for fine-tuned adjustments and a dedicated coolant system to maintain optimal temperatures, ensuring consistent performance for tool and die making as well as mold manufacturing applications.

Technical Specifications

Model	618A
Construction	Cast Iron
Coolant System	Yes

Features

Key Capabilities	High Accuracy, Fine Finishing, Vibration Dampening, Manual Control
------------------	--

Applications

Ideal Applications

- Tool and Die Making
- Mold Manufacturing
- Precision Machining
