

# Precision Turning and Milling Parts

These precision-engineered metal parts are manufactured through turning and milling processes. The components are suitable for a wide range of industrial applications, offering high accuracy and durability.

## Product Overview

### Precision Turning and Milling Solutions

These precision-engineered parts are manufactured through advanced turning and milling processes, designed to offer high accuracy and long-term durability for industrial applications. Our manufacturing facility provides comprehensive OEM/ODM capabilities, allowing for fully customized solutions tailored to specific engineering requirements. The components are built using high-grade metal processing techniques, ensuring consistent quality for critical mechanical assemblies.

## Manufacturing Capabilities

### Production Capacity

**6500 sqm**

Facility Area

**4 million USD**

Annual Output Value

### Processing Methods

Turning, Milling, Laser Cutting, Flame Cutting, Plasma Cutting, Riveting, Welding

## Equipment & Machinery

### Primary Processing Equipment

Equipment Category	Quantity/Type
Laser Cutting	HanKwang Machine
Bending	Japanese AMADA (8T, 80T, 150T)
Punching	Japanese AMADA (35T, 45T)
Welding	Matsushita Robots
Hydraulic Press	YH32-200A

## Industry Applications

### Supported Industries & Parts

- Auto parts
- Forklift accessories
- Air conditioning components
- Sheet metal parts
- Elevator components
