

Precision Vernier Caliper for Dimensional Measurement

This precision measuring instrument is designed for accurate dimensional measurements. It is suitable for use in engineering, manufacturing, and quality control applications.

Product Overview

Precision Dimensional Measurement

This precision vernier caliper is engineered for high-accuracy dimensional measurements in demanding environments. It features a robust design with both main and vernier scales, equipped with specialized jaws for versatile internal and external gauging. Built from durable materials, this instrument is an essential tool for professionals in engineering, manufacturing, and quality control sectors.

Technical Features

Build Quality

Durable Material • Precision Engineered

Measurement Types

Internal Measurement, External Measurement

Applications

Suitable Industries

- Mechanical Engineering
- Manufacturing
- Quality Control Inspection
