

Precision Vernier Caliper with Metric Scale

This is a high-precision vernier caliper designed for accurate measurements. It features a metric scale with a 0.02mm resolution and includes a protective case.

Product Overview

Professional Precision Measurement

This high-precision vernier caliper is designed for demanding engineering, machining, and quality control applications. With a robust metric scale offering a resolution of 0.02mm, it ensures reliable and consistent accuracy for professional tasks. The instrument comes equipped with a dedicated protective case, making it an ideal choice for workshop environments requiring secure storage and transport.

Technical Specifications

Resolution

0.02 mm
Resolution

Scale System

Metric

Model Identifiers

AA40, AP08886

Features

Included Items

- Vernier Caliper
- Protective storage case

Primary Applications

Engineering • Machining • Quality Control
