

Precision Wood and Metal Cutter Set

This set includes multiple cutters with varying blade configurations. They are designed for precision cutting and shaping of wood and metal materials.

Product Overview

Precision Cutting Performance

This professional-grade cutter set is engineered for high-precision shaping and profiling of wood and metal workpieces. The set includes three distinct blade configurations, each featuring a cylindrical shank designed for secure mounting in standard machine tools. Housed in a protective wooden storage box with a high-visibility yellow insert, these tools are built to deliver consistent results in demanding workshop environments.

Technical Specifications

Set Composition

- 3-piece cutter set
- Multiple blade configurations
- Wooden storage case included

Storage Features

Wooden Case • Protective Insert

Mounting System

Cylindrical shank

Applications

Woodworking, Metalworking, Precision Shaping, Profiling
