

Precision Woodworking Jointer

This precision woodworking jointer is designed for accurate stock preparation. It features a robust cast iron construction for stability and vibration dampening.

Product Overview

Professional Woodworking Jointer

This precision woodworking jointer is engineered for superior stock preparation and surface accuracy. Built with a robust cast-iron frame, the unit minimizes vibration to ensure consistent results during operation. It features adjustable infeed and outfeed tables and a multi-knife cutterhead for high-quality surfacing, making it an essential tool for high-precision carpentry tasks.

Technical Specifications

Build Material	Cast Iron
Cutterhead System	Multi-knife

Features

Safety and Control

- Integrated safety guard system
- Adjustable infeed and outfeed tables
- Conveniently located On/Off switch
- Vibration dampening construction
