

Precision Woodworking Machine with Safety Guard

This woodworking machine features a sturdy metal frame and a precision-engineered tabletop. Equipped with adjustable wooden fences and a transparent safety guard, it is designed for accurate and safe woodworking operations.

Product Overview

Professional Precision Woodworking

This precision woodworking machine is engineered for high-accuracy cutting and shaping tasks in demanding environments. It features a robust metal frame construction providing stability, complemented by an adjustable tabletop system and integrated safety mechanisms. The design balances professional-grade performance with a compact footprint, making it an ideal choice for both industrial workshops and specialized manufacturing stations.

Technical Specifications

Frame Material	Metal
Frame Color	Blue

Features

Adjustment Capabilities

- Adjustable wooden fences
- Precision-engineered tabletop

Safety Features	Transparent Safety Guard
