

Prepaid Gas Meter IC Card

This prepaid gas meter uses IC card technology for precise gas consumption measurement and secure payment processing. It is designed for reliable performance and efficient gas management in residential and commercial applications.

Product Overview

Secure IC card used for credit management and gas flow authorization.

Smart Gas Metering Solution

The Prepaid Gas Meter IC Card system provides a secure and efficient way to manage gas consumption for residential and commercial applications. By utilizing advanced IC card technology, this solution ensures accurate billing and reliable payment processing, allowing users to prepay for their gas usage. The meter features a robust, tamper-proof design that supports modern utility management and resource optimization.
