

Pressed Steel Cable Spool Bobbin

This pressed steel bobbin cable spool features good rigidity and dynamic balance. Its concentric design ensures high performance in cable winding applications.

Product Overview

Industrial Pressed Steel Cable Spools

These high-durability pressed steel cable spools are engineered for efficient winding, storage, and transport of steel wires, copper cables, and welding materials. Designed with precision to support high-speed processing, these bobbins are essential for applications involving stranding, bunching, annealing, and enameling machines. Their robust construction ensures reliable performance in heavy-duty industrial settings.

Product Series

Available Series

Corrugated Steel Series, Double Layer High Speed Series, Flat High Speed Series, Plastic Wire Spools

Technical Specifications

Detailed Technical Parameters

Model	Plate Diameter (mm)	Major Diameter (mm)	External Width (mm)	Internal Width (mm)
315	315	120	238	200
400	400	160	300	250
500	500	250	335	315
630	630	335	495	450
800	800	450	600	500
900	900	380	764	720
