

Pressed Steel Scooter Wheel 12x3

This scooter wheel measures 12x3. It features pressed steel construction with a central mounting hub and weight-reducing apertures.

Product Overview

Industrial Pressed Steel Scooter Wheel

This durable 12x3 scooter wheel is engineered using pressed steel for high-strength performance in demanding applications. The design incorporates strategic apertures to ensure efficient weight reduction and improved ventilation during operation. It serves as a reliable component for professional transport and logistics equipment.

Technical Dimensions

Wheel Dimensions	12x3
Wheel Axle Size	45.2 mm
Bearing Hole Diameter	90 mm
Construction Material	Pressed Steel, Silver Finish
