

Pressure Booster Water Pump System

This pressure booster water pump system is designed for increasing water pressure in residential or commercial applications. It is suitable for maintaining consistent water pressure for various uses such as irrigation, domestic water supply, and industrial processes.

Overview

High-Performance Pressure Boosting

This pressure booster water pump system is engineered to provide consistent and reliable water pressure for both residential and commercial environments. Featuring a durable stainless steel pump head and a robust horizontal pressure tank, the unit ensures longevity and efficient operation. It is an ideal solution for diverse applications, including irrigation, domestic water supply, and various industrial processes.

Technical Specifications

Included Components

- Horizontal pressure tank
- Stainless steel pump head
- Integrated motor
- Pressure gauge
- Connecting hoses

Pump Head Material

Stainless Steel

Suitable Applications

Residential, Commercial, Irrigation, Domestic Water Supply, Industrial Processes
