

# Pressure Reducing Valve with Adjustable Knob

This pressure reducing valve is designed to regulate and maintain consistent downstream pressure. It is constructed from brass and includes connections for pressure gauges.

## Pressure reducing valve

Code	Spec.
Y00585	15mmx15mm
Y00586	22mmx22mm

### ADDITIONAL IMAGES

## Product Overview

### Professional Pressure Regulation

This high-performance pressure reducing valve is engineered to maintain consistent downstream pressure in plumbing and HVAC systems. Featuring a durable brass construction and an adjustable manual knob, it offers precise control for optimal performance. Designed for longevity and reliability, it is an ideal solution for professionals seeking efficiency in potable water and heating applications.

## Technical Specifications

### Available Sizes

Product Code	Specification
Y00585	15mm x 15mm
Y00586	22mm x 22mm

<b>Material</b>	Brass
<b>Suitable Applications</b>	Potable Water, HVAC Systems, Plumbing

## Key Features

### Features

- Adjustable pressure setting via integrated knob
- Includes ports for pressure gauge connection
- Green manufacturing process
- High-efficiency pressure regulation

### Quality Standards

Guaranteed Quality • Professional Grade
