Product Overview

High-Performance Pressure Reduction

This pressure reducing valve is engineered to automatically regulate and stabilize water system pressure, protecting downstream appliances from damage. Featuring a durable brass construction and an integrated strainer, it offers high reliability for residential, commercial, and industrial plumbing. The compact design ensures easy installation while providing precise, adjustable pressure control for consistent system performance.

Technical Specifications

Max Inlet Pressure	16 bar
Outlet Pressure Range	1 - 6 bar
Max Reduction Ratio	6:1
Operating Temperature	0 - 65°C

Physical Properties

Available Thread Sizes

- 1/2"
- 3/4"
- 1"

Thread Standards

- G
- NPT

Construction Material

Brass

Compliance and Features

Optional Features

Pressure Gauge • Integrated Strainer

Certifications

CE, ISO
