

Pressure Washer Lance Pair

This product is a pair of lances designed for use with pressure washers or similar fluid dispensing systems. The set includes one lance with a nozzle-like end and another with a connection point for a hose or accessory.

Product Overview

High-Performance Lance System

This pressure washer lance pair is engineered for fluid dispensing systems requiring precision and durability. Constructed from high-grade composite materials, these components feature varied diameters to optimize fluid dynamics and maintain consistent pressure. The ergonomic design ensures ease of handling during intensive cleaning operations, making this set a reliable addition to your industrial maintenance toolkit.

Technical Specifications

System Components

- Primary dispensing lance with nozzle tip
- Connection-point accessory lance

Design Features

Variable diameter profile • Ergonomic construction • Fluid dynamic optimization

Material Composition

Durable Composite, Industrial Plastic
