

Pressurized Steam Cleaning Machine

This portable steam cleaner is designed for efficient and chemical-free cleaning. It utilizes pressurized steam to remove dirt, grease, and grime from various surfaces.

Overview

Portable Steam Cleaning Solution

The SCM-101A is a versatile portable steam cleaner designed for efficient, chemical-free sanitization and cleaning. It utilizes high-temperature pressurized steam to effectively remove dirt, grease, and grime from a variety of surfaces, including upholstery and hard surfaces. With its compact, lightweight design and rapid heating capabilities, this device is engineered for ease of use in both household and light commercial settings.

Technical Specifications

Performance Metrics

900 W Power	3.5 BAR Steam Pressure	135 °C Steam Temperature	28 G/MIN Steam Flow
-----------------------	----------------------------------	------------------------------------	-------------------------------

Capacity & Operational Timing

- Max Tank Capacity: 450ML
- Rated Water Capacity: 150-270ML
- Heating Time: Approx 5 Minutes
- Steam Availability: About 10 Minutes

Electrical Compatibility

100-127V~, 220-240V~ (50Hz)

Safety & Standards

Certifications

CE • GS • RoHS

Safety Features

- Fuse switch: 169°C
- Overheat protection
- Safety cap

Logistics & Packaging
