

Printing Blanket for Ink Transfer

The printing blanket ensures quality in various printing applications. It is engineered for optimal ink transfer, durability, and consistent performance.

Product Overview

Professional Printing Blankets for Ink Transfer

These high-quality printing blankets are engineered for optimal ink transfer, durability, and consistent performance across diverse printing environments. Designed to provide excellent resistance to solvents and chemicals, they ensure long-lasting operational reliability. The range includes specialized options for standard, bar-mounted, and UV printing applications to suit specific industrial and commercial requirements.

Technical Specifications

Available Thickness

- 1.0mm
- 1.70mm
- 1.95mm

Available Types

Type	Colors
Standard Blanket	Blue, Green
Blanket with Bars	Blue, Green
UV Printing Blanket	Red
Underlay	Black, White

Ply Construction	3 Ply, 4 Ply
