

Printing Machine Component with Rectangular Opening

This is a component designed for use in printing machinery. It features a rectangular opening, possibly for a screen or display, surrounded by a silver-colored bezel.

Product Overview

Precision Component for Printing Machinery

This specialized component is designed for integration into plate-making or printing machinery systems. Featuring a distinct pink, textured surface and a durable silver-colored bezel, it is engineered for compact and rounded equipment configurations. The central rectangular opening is optimized for screen or display integration, ensuring seamless functionality within your existing production setup.

Physical Characteristics

Color and Finish	Pink with textured surface and silver-colored bezel
Form Factor	Compact, rounded design
Interface Features	Rectangular opening, Display-ready bezel

Application

Compatible Machinery

- Plate-making machinery
- General printing machinery
