

Product Certification Services

We assist customers in applying for multinational certifications, conducting tests for CE, FCC, CCC, C-Tick, ETL, UL, EK-MARK, and RoHS. This ensures products meet required safety and environmental standards.

Service Overview

Professional PSE Certification Services

Our certification service facilitates compliance with Japan's DENTORL method, the electrical equipment and material control law. This essential certification covers 498 product categories, ensuring your goods meet rigorous safety standards required for the Japanese market. We manage the entire process, including mandatory factory inspections and official detection procedures, to help you achieve market entry efficiently.
