

## Production Line

Production lines are engineered to streamline manufacturing and assembly processes. These systems facilitate the efficient movement of materials and products through various stages of production.

### Product Overview

#### Exquisite Japanese Craftsmanship

This set features traditional Japanese Kiriko cut glass sake cups, meticulously handcrafted to showcase intricate geometric and floral motifs. Each of the five cups is crafted from vibrant blue glass with clear bottoms, offering a stunning visual appeal that highlights the precision of the cut. Presented in a secure, light-colored wooden box, this collection is an ideal choice for sake enthusiasts or as a premium decorative gift.
