

Professional Audio Compression Driver 50W RMS

This compression driver is designed for professional audio applications. It provides accurate sound reproduction across a wide frequency range and is suitable for loudspeakers and sound reinforcement systems.

Overview

Professional Audio Performance

This high-performance compression driver is specifically engineered for demanding professional audio applications and sound reinforcement systems. Built for durability and consistent sound reproduction, it features a titanium diaphragm and a 44mm voice coil for high power handling. Its robust design ensures efficient energy transfer and clear, accurate output across a wide frequency spectrum.

Technical Specifications

Power Handling

50 W RMS
Power Handling

108 dB
Sensitivity

Frequency Response	1kHz - 20kHz
Impedance	8 Ohms

Construction

Diaphragm Material
Titanium

Voice Coil Diameter	44 mm
