

Professional Audio Speaker System

This high-fidelity audio speaker system is engineered for professional use. It features a two-way configuration with a tweeter and woofer for accurate sound reproduction and durable construction for optimal acoustic performance.

Product Overview

Professional Audio Excellence

This high-fidelity audio speaker system is engineered for precision and professional-grade sound reproduction. Featuring a robust two-way configuration with a dedicated tweeter and woofer, it delivers accurate audio across a broad frequency spectrum. The durable enclosure design minimizes unwanted resonance, ensuring optimal acoustic clarity in demanding environments such as studio monitoring and high-end home theater systems.

Technical Specifications

Components

- Dedicated tweeter
- Woofer

System Configuration	Two-way system
Connection Type	Rear-mounted terminals

Applications

Recommended Uses	Studio Monitoring, Home Theater, Audiophile Listening
