

Professional Audio-Video System Component

This professional-grade television component is designed for integration into advanced audio-video systems. The device is rack-mountable and suitable for broadcast or professional video applications, featuring a front-panel display and navigation controls.

Product Overview

Professional Audio-Video Integration

This professional-grade audio-video system component is specifically engineered for high-performance broadcast and integration environments. Designed for standard rack mounting, the unit offers advanced control through a front-panel display and integrated navigation interface. It features dedicated visual status monitoring via indicator LEDs, ensuring reliable operation for mission-critical video applications.

System Features

Control Interface

- Front-panel display
- Tactile navigation controls
- Power status monitoring
- Operational field status
- Alarm indicator LEDs

Supported Technologies

Digital, DVB, LNB

Design and Build

Form Factor

Rack-mountable

Model Identifier

GC 1890D
