

Professional Audio-Visual System Component

Professional-grade television component designed for integration into advanced audio-visual systems. It features a front-panel display, navigation controls, and indicator LEDs for power and signal status.

Overview

Professional AV Integration

This professional-grade audio-visual component is precision-engineered for high-demand broadcast and commercial video environments. It features a robust rack-mount design that ensures seamless integration into existing infrastructure. Equipped with intuitive front-panel navigation and clear status indicators, this system provides reliable control for mission-critical applications.

Technical Specifications

Interface Capabilities

- Front-panel display
- Navigation controls
- Power status LED
- Video signal status LED
- Audio signal status LED

Primary Applications

Broadcast • Pro Video • System Integration

Model Identification

DQ-3600II

Installation Type

Rack-mount, Professional AV
