

Professional Ceramic Hair Straightener with LCD

This professional hair straightener is designed for efficient and safe hair styling. It features rapid heating technology, adjustable temperature settings, and ceramic-coated plates.

Product Overview

Professional Ceramic Performance

This professional-grade hair straightener features advanced ceramic-coated floating plates designed for smooth gliding and reduced hair damage. Equipped with a precise LCD temperature display, it allows for customizable styling between 120°C and 230°C to suit various hair types. The ergonomic design includes a 360-degree swivel cord for tangle-free operation and a convenient handle lock for safe storage.
